

## Mobile Valve Repair Facility

Introducing the availability of an onsite mobile valve repair trailer. This mobile facility enables us to test, repair and certify flanged or screwed pressure relief valves onsite without the need to send your valves off site for final setting and testing. Onsite capabilities include steam, air, gas and liquids providing **Pioneer Industrial Corporation** the most comprehensive field service capacities in the industry.

Designed for customer's with very tight maintenance repair windows, this self contained trailer brings the high quality of shop repairs to the field where the customer can monitor onsite the status of valve repairs.

The trailer is staffed with highly skilled factory trained technicians providing us the capability to repair any manufacturer's safety, safety relief and pilot relief valves. Our extensive inventory of OEM replacement parts and established working relationships enables us to obtain repair parts and meet the short maintenance repair windows demanded by our customers.

Backed by **Pioneer Industrial Corporation** 20 year's experience, we are ready to meet the needs of our customer's in providing state of the art onsite valve repair service.

### Mobile Repair Trailer Equipment

Lathe, drill press, one ton bridge crane, glass bead blaster, lapping machine, high pressure air accumulator, ASME approved test apparatus 3500 psig air/water, 250 psig steam, air compressor, steam generator, hydrostatic and electronic testing equipment, assorted hand tools and support equipment

Utilities required 200A 440v/3ph/60cy power with steam, 100A 440v/3ph/60cy without, plant water for liquid testing

### Certifications

ASME Code Section I "V" Symbol Stamp assembly and testing of New Safety Valves

ASME Code Section VIII "UV" Symbol Stamp assembly and testing of New Pressure Relief Valves

National Board of Boiler & Pressure Vessel Inspectors NBBI "VR" symbol stamp; repair and testing of safety valves, safety relief valves, pilot operated valves

### Capabilities

Safety, pressure, pilot operated relief valves; gate, globe, check, plug, ball and butterfly valves; control valves; electric valve actuators, pneumatic actuators, onsite machining; valve repacking services; rotating equipment repair
