Subject: Discontinuation of the following iSeries instruments:

42i
42iLS
43i
48i
49i
49iPS
410i
146i
111

Dear Customer:

We are pleased to announce the release of the next generation Thermo Scientific gas analyzers. The iQ series gas analyzers are designed to be more reliable and more accessible than their iSeries counterparts while offering faster, more precise and uninterrupted data acquisition capabilities. For more information on the Thermo Scientific iQ Series gas analyzers or the Thermo Scientific iQ Series platform, please visit www.thermofisher.com/iQseries and review our press release at the Thermo Fisher Newsroom; [Next-Generation Gas Analyzers Ease Air Quality Data Acquisition and Control](#)

As a result of the next generation commercialization, the corresponding iSeries analyzers (listed above) will be discontinued per the following schedule:

Last Dates Accepting

- **Instrument Orders – June 30, 2018**
- **Consumables, Spare Part and Service Support Availability* – December 31, 2025**

Thermo Fisher Scientific stands behind its product, and we intend to provide service parts support and accessories for affected models, based on availability*, through 2025. The discontinuation of the products listed above is part of our portfolio management process aimed at providing customers with our latest technology and the best solutions to meet their gas monitoring needs.

We look forward to the continuing opportunity to serve our customers, and toward assisting you through this product transition.

Sincerely,

Mike Loncar
Product Line Manager
Environmental & Process Monitoring
